

# MicroCare®

## Benchtop Cleaning Questionnaire

- What are the parts being cleaned (description, including material)?
- How do you determine cleanliness (visual, black light, particle count, water break, etc.)?
- What is the criteria for acceptable cleanliness?
- What is the contamination/soil being removed (please provide SDS)?
- What type of solvent is currently being used (name, concentration)?
- What type of equipment is being used?
- What is the process being used (time, temperature and any enhancements)?
- What is the problem with the current process (cost, cleanliness, waste, safety, etc.)?
- Is the current process effective? If no what are the issues?
- Why are you interested in our products/process?
